Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony H. Azure (Reg. 52,580) on 29 September 2003.

The application has been amended as follows:

Cancel claims 26-29.

Allowable Subject Matter

2. Claims 1-25 and 30-33 are allowed.

3. The following is an examiner's statement of reasons for allowance: Regarding claims 1-25, Prior Art failed to teach a laser apparatus comprising a gain medium having a first and second facet; a reflector (end mirror) positioned on the same side as the first facet of the gain medium, wherein the reflector (end mirror) and the second facet of the gain medium form an external cavity; an optical output assembly positioned on the same side as the second facet of the gain medium and being optically coupled

Art Unit: 2828

the second facet; a first thermally conductive substrate having the gain medium and the optical output assembly mounted thereon; a thermoelectric controller thermally controlling the temperature of the gain medium and output assembly by way of thermal conduction through the first substrate; and, a second substrate having the reflector (end mirror) mounted thereon, wherein the second substrate is thermally isolated from the first thermally conductive substrate and is thermally controlled to control the temperature of the reflector (end mirror) independently of the temperature or change in temperature of the gain medium and/or optical output assembly. Therefore, the first thermally conductive substrate is thermally isolated from the second substrate and is thermally controlled to control the temperature of the gain medium and/or optical output assembly independently of the temperature or change in temperature of the reflector (end mirror), as well.

Regarding claims 30-33, Examiner viewed claims 30-33, as claims 1-25 above, having further limitations of a collimating lens, a fiber focus lens and an optical fiber, since independent claim 30 also recites. This limitation of a "means for providing selective thermal control to said optical output assembly independently from said reflector" was limited in that the Examiner looked to the specification to find what the "means" was to be interpreted as. In this case the "means" was interpreted as "a first thermally conductive substrate having the gain medium and the optical output assembly mounted thereon; a thermoelectric controller thermally controlling the temperature of the gain medium and output assembly by way of thermal conduction through the first substrate; and, a second substrate having the reflector mounted thereon, wherein the

second substrate is thermally isolated from the first thermally conductive substrate and is thermally controlled to control the temperature of the reflector independently of the temperature or change in temperature of the gain medium and/or optical output assembly."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
